

CSCE 242 Project Part 1: Topic Selection

Ethan Helms

Website Name: AutoVault

Description:

AutoVault is a website designed for car enthusiasts who want to learn more about different vehicles, their performance, and ways to maintain or modify them. The website will feature a large gallery of cars and trucks, along with information such as horsepower, torque, engine specifications, and performance statistics. Visitors will also be able to learn about common maintenance procedures and popular modifications that can improve the appearance or performance of a vehicle. AutoVault will organize this information into easy-to-navigate sections so that users can quickly find information about the vehicles and topics that interest them. The website will also use interactive features such as a JavaScript slideshow to make browsing the vehicle gallery more engaging and visually appealing.

Website Pages:

1. Home
2. Vehicle Gallery
3. Performance
4. Maintenance and Modifications
5. About AutoVault
